

Creating Materials & Energy Solutions

OUR CORE VALUES

EXCELLENCE:

We are recognized for world-class research, nurturing excellence in science, education and people.

PEOPLE:

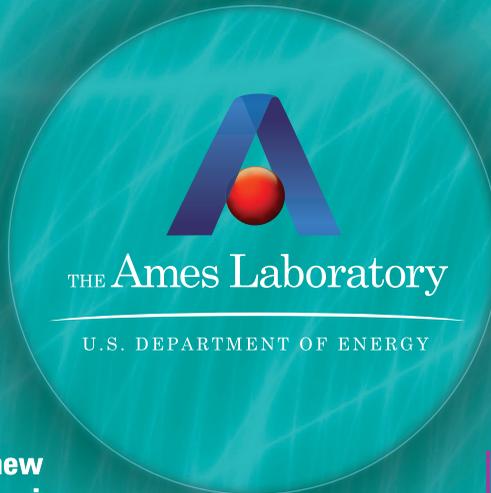

Our people are the core of our success.

SAFETY:

We demonstrate that safety and world-class research go hand in hand.

INSPIRATION:

We inspire future generations by exciting them about science.

AGILITY:

We adapt with agility to new opportunities and the changing needs of society.

INNOVATION:

We link fundamental science of matter with application to create technological innovation.

COLLABORATION:

We are singularly focused on applying a multidisciplinary approach to the discovery, design and invention of new materials. We foster collaboration globally.

Ames Laboratory creates innovative materials, technologies and energy solutions. We use our expertise, unique capabilities and interdisciplinary collaborations to solve global challenges.
